

Activities Report on  
**LinkSCEEM- SESAME outreach at the 7th SESAME Jordanian National Committee**

University of Jordan, Amman, Jordan

Tuesday, 5 May, 2011

Following the previous outreach activities launched by SESAME, Two talks were about linkSCEEM project and the HPC opportunities to the Jordanian researchers and synchrotron applications during the 7th SESAME Jordanian National workshop at the University of Jordan, theater of King's Abdullah II College for Information Technology.

The subjects of the two presentations were conducted:

- LinkSCEEM-SESAME Outreach by Eng. Salman Matalgah, SESAME computing group leader
  - The talks covers: SESAME Computing and Network overview, LinkSCEEM and HPC opportunities , HPC resources available for SR users and beamlines applications.
- State-of-the-Art XRF/XAFS Beamline at SESAME for Scientific Research Application by Dr. Messaoud Harfouche , SESAME Beamline scientist

The feedback of the audience was very valuable and focused on the HPC opportunities which can help the Synchrotron radiation applications and researchers.
